ShotSpotter® Mobile™

ShotSpotter Alerts for iOS and Android

Instant ShotSpotter alerts anytime, anywhere on iOS and Android devices.

ShotSpotter Mobile

ShotSpotter Mobile makes it easy for all law enforcement personnel to receive instant alerts on their mobile devices. These 'always on' push notifications of gunshot incidents are instantly sent to a user's mobile device in real-time so that department personnel never miss an alert—no matter where they are or what they are doing.

ShotSpotter alerts anytime, anywhere

The ShotSpotter app allows access to ShotSpotter alerts on your phone on the beat, at home on your tablet, or on your desktop in the office.

Enhancing officer safety

The ShotSpotter app low light interface gives immediate access to incident detail, including street view, time since trigger pull and intelligence from IRC analysts.

Anytime, anywhere access enables greater situational awareness at crime scenes and helps to reduce risk for officers in the field.

Now available for download

The Shotspotter app is available as a free download from the Apple App Store and Google Play and requires a ShotSpotter® Flex℠ login and agency access to the ShotSpotter app.

ShotSpotter® Detect·Protect·Connect

ShotSpotter® Mobile™

Key Benefits

- Access to ShotSpotter alerts on your phone on the beat, at home on your tablet, or on your desktop in the office;
- Push notifications mean you never miss a gunfire incident regardless of where you are or what you are doing;
- Simple provisioning for new agencies and new users—resulting in minimal IT involvement and overhead at the agency level;
- 25 meter evidence search area and time since trigger pull delivered via a low light user interface that delivers results while enhancing officer safety.
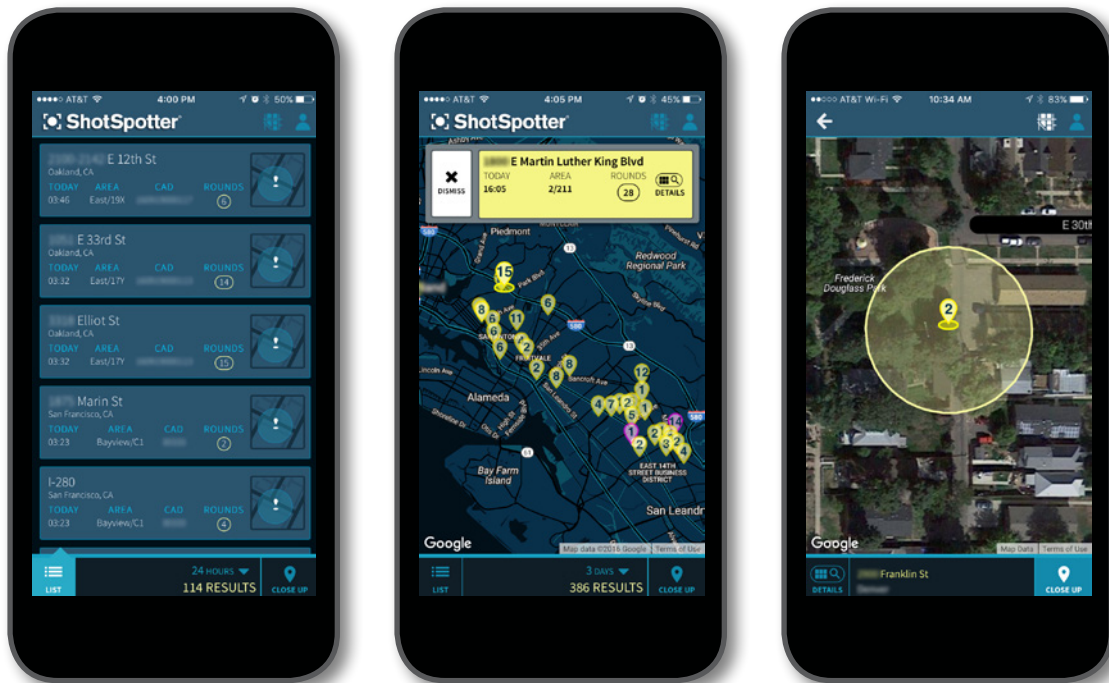

Key Features

- iOS and Android system notifications with unique ShotSpotter audible alert;
- Precise incident location identified by dot on the map with street view and 25 meter evidence search area;
- 7-day, 3-day and 24-hour incident list and map view;
- Incident detail includes: audio, rounds fired, nearest address, trigger time, reviewer comments and CAD.

Minimal IT Involvement Required

ShotSpotter Mobile works exclusively with ShotSpotter® Flex℠ and is offered as a free download through the Apple App Store and Google Play. App download and provisioning is simple and requires minimal IT involvement or agency overhead.

"This app is very straightforward and easy to use and lets us know the address and how many shots are fired. We get the information live—anywhere, anytime—without having to exclusively rely on dispatch to call us or take the time to log on to a system."

— Captain Tony Bontrager, South Bend Police Department
